### Ongoing formative feedback from assessor:

- **Attendance:** Weak
- **Lab / In-class Activity:** Very Weak
- **One-to-one Formative Discussion:** Good

### Assessor feedback for summative assessment:

#### General Feedback

the student submitted SDD and application for Assignment and attended Oral session to demonstrate the submitted application, the student performance as following:

the student produced a problem statement supported by system requirements, provide a list of potential risks But the list provided lack design and development risks, and perform system analysis and Interface design activity for his application..

the student provide a research and justification for his chosen development techniques, tools and methodologies used. and provide a comparison for development tools, techniques and methodologies and provide an evaluation for his business solution based on project proposed.

the student presented the Design and documented the feedback given.

in oral session the submitted application and the functional requirement were validated,

the student provide a test plan, then implement the test plan and provide a review of performance for his application. provide a critical review for Design, Development and Testing Stages, evaluated new Opportunities for his business application also provide a justification for feedback and future opportunities.

## Strength of Performance

The student was able to:

- Produce a well-defined problem definition statement, supported by a set of user and system requirements for a business problem.
- Review areas of risk related to the successful development of a proposed application.
- Research the use of software development tools and techniques for the development of a proposed application.
- Conduct a peer review of the problem definition statement, proposed solution and development strategy, documenting any feedback given.
- Develop a functional business application with support documentation based on a specified business problem.
- Review the performance of the business application against the problem definition statement and initial requirements.
- Analyse a business-related problem using appropriate methods to produce a well-structured software design document.
- Justify the software development tools and development methodology selected.
- Interpret peer-review feedback and identify opportunities not previously considered.
- Develop a functional business application based on a specific software design document, with supportive evidence of using the preferred tools, techniques and methodologies
- Critically review the design, development and testing stages of the application development process including risks.
- Evaluate the solution to a business-related problem and the preferred software development methodology by comparing the various software development tools and techniques researched.
- Justify improvements to the business application system made because of feedback and also feedback which was not acted upon, including opportunities for improvement and further development.

## Limitation of Performance

No limitation has been addressed.

**Assessor Declaration:**

I declare that the work submitted for assessment has been carried out without assistance other than that which is acceptable according to the rules of the specification. I certify that to the best of my knowledge the evidence submitted for this assignment is the student's own. The student has clearly referenced any sources, and any AI tools used in the work. I have not solely used AI to mark student's work. I understand that false declaration is a form of malpractice.

**Assessor Name: Sultan Alrushdan      Assessor Signature: Sultan Alrushdan**

**Student Declaration:**

I certify that the formative and summative assessments for this assignment have been fully explained and understood by me, I also do understand that the grade above is simply a recommendation that could later be changed during any of the verification processes.
